EXPERIENCE

Futurescape Technologies — Software Developer

MARCH 2023 - PRESENT | NAVI MUMBAI, MH

OneSociety (Society Management Application)

- **Reusable Library:** Engineered a library using RJSF, MUI DataGrid, and tools (rjsf-conditionals, json-rules-engine, json-path-plus, mathjs) in Next.js to dynamically generate forms and tables with advanced validation.
- **Accelerated Development:** Reduced form page creation time by 80% through built-in validation and an intuitive UI.
- **Boosted Scalability:** Designed a modular codebase that cut feature integration time by 40%, enhancing overall application scalability and maintainability.
- **Enhanced User Experience:** Implemented responsive design and intuitive UI components, resulting in a 20% increase in user engagement.

OneDashboard (SSO for interconnected apps)

- **Developed Unified SSO Dashboard:** Spearheaded the creation of OneDashboard using Supabase, Next.js, and Keycloak, enabling single sign-on for over 5 interconnected apps and streamlining access.
- **Implemented RBAC:** Integrated robust Role-Based Access Control (RBAC) across sibling projects, reducing user permission management overhead by 50% and strengthening security protocols.
- **Enhanced Security & User Management:** Improved system security by integrating advanced authentication mechanisms, leading to a 30% reduction in unauthorized access incidents while ensuring a seamless user experience.

Pinsout Innovations — Software Developer

AUGUST 2022 - MARCH 2023 | NOIDA, UP

Qollabb (online job portal)

- **Backend Development:** Solely developed backend services for employer, educator, mentor, and student sections using Express.js, PostgreSQL, and Sequelize, efficiently handling thousands of API requests daily.
- **Frontend Development & Leadership:** Led the development of the employer section frontend using React, overseeing a small team and optimizing performance to reduce load times by 30%.

ConsultMyAstro (chat and call application for astrologers)

- **Backend Development:** Solely developed backend services using Express.js.
- **Real-Time & Transaction Modules:** Implemented a real-time chat module with Socket.io, along with an integrated payment module and wallet system.
- **Frontend Collaboration:** Contributed significantly to frontend development to enhance overall UI/UX.

SKILLS (2.8+ years of experience)

FRONTEND: React JS, NEXT JS, Redux, MUI, tailwind, GSAP, framer-motion, Socket.io

BACKEND: Node JS, Express, Fastify, Passport JS, MongoDB, Postgres, Sequelize, Mongoose, Micro-services

OTHER: Nx Monorepo, Micro-Frontend, Docker, JavaScript, Typescript, GIT, Electron JS, AWS, Nginx

EDUCATION

LPU — MCA (8.8 CGPA)

AUGUST 2021 - MAY 2023

LANGUAGES

English, Hindi, Marathi

PERSONAL PROJECTS

BUDDY E-COMMERCE — MERN WEBAPP | 2022

<https://github.com/NishantJS/Buddy-Backend>
<https://github.com/NishantJS/Buddy-Frontend>

MERN stack web application with Passport + JWT Authentication, mongoose, AWS EC2 + S3 storage.
