EXPERIENCE

Futurescape Technologies — *Software Developer*

MARCH 2023 - PRESENT | NAVI MUMBAI, MH

OneSociety (Society Management Application)

- **Reusable Library:** Built a dynamic form and table generation library in a monorepo architecture using Nx and Next.js multi-zones to rapidly create complex, validation-driven form pages with minimal configuration.
- **Accelerated Development:** Automated field validation, conditional logic, and table data rendering through configurable schemas, significantly reducing form page creation time.
- **Micro-Frontend Architecture:** Designed independent, scalable modules to enable seamless feature delivery and maintainability.
- **Boosted Scalability:** Implemented a modular codebase to support reusable components and enhance maintainability across applications.

OneDashboard (SSO for interconnected apps)

- **Developed Unified SSO Dashboard:** Spearheaded the creation of OneDashboard using Supabase, Next.js, and Keycloak, enabling seamless single sign-on across multiple interconnected applications.
- **Implemented RBAC:** Integrated robust Role-Based Access Control (RBAC) across sibling projects, streamlining user permission management and enhancing security protocols.
- **Enhanced Security & User Management:** Strengthened system security by implementing advanced authentication mechanisms while ensuring a seamless user experience.

Pinsout Innovations — *Software Developer*

AUGUST 2022 - MARCH 2023 | NOIDA, UP

Qollabb (online job portal)

- **Backend API Development:** Independently designed and developed backend services for employer, educator, mentor, and student modules, ensuring reliable and efficient API request handling.
- **Frontend Development & Team Collaboration:** Led the development of the employer section frontend, guiding a small team to deliver optimized, high-performance user interfaces.

ConsultMyAstro (chat and call application for astrologers)

- **Real-Time Communication System:** Developed a real-time chat module with seamless messaging functionality using WebSocket-based architecture.
- **Wallet & Payment Integration:** Engineered a secure payment module and digital wallet system, enabling seamless transactions and balance management.

SKILLS (2.8+ years of experience)

FRONTEND: React.js, Next.js, Redux, MUI, Tailwind, GSAP, Framer Motion, Socket.io, SCSS

BACKEND: Node.js, Express, Fastify, Passport.js, MongoDB, PostgreSQL, Sequelize, Microservices

TESTING: Jest, React Testing Library, Playwright

OTHER: Nx Monorepo, Micro-Frontend, Docker, JavaScript, TypeScript, Git, Electron.js, AWS S3 & EC2, , Nginx

EDUCATION

LPU — *MCA* (8.8 CGPA)

AUGUST 2021 - MAY 2023

PERSONAL PROJECTS

BUDDY E-COMMERCE — *MERN WEBAPP* | 2022

https://github.com/NishantJS/Buddy-Backend
https://github.com/NishantJS/Buddy-Frontend

MERN stack web application with React.js, Passport + JWT Authentication, mongoose, AWS EC2 + S3 storage.
